Providing an efficient method for supporting & pulling cables

» Slegers Cable Pulling Grips provides a quick & reliable solution for most cable installation projects

Mamba Snake | Cable Pulling Grips »

Product Overview

Introducing the New Slegers range of Hi Tensile quality Cable Pulling Grips. Cable Pulling Grips are indispensable in many different cable pulling applications and are widely used for installation and maintenance work on **electrical & power cables, wire rope, wire cable, telephone & fibre optic cables.** Manufactured from Hi Tensile galvanised steel strands. Cable pulling grips are slipped over the outer sheath of a cable and when pulling tension is applied, the cable pulling grip contracts applying its gripping force to the outside of the cable. Slegers Cable pulling grips come in Single eyelet for light to medium hauling, Double eyelet for medium to heavy hauling and our range of Junior Cable pulling grips which are designed to fit onto either 3.0mm fibreglass rods or 4.0mm Nylon fish rods, for all light to medium hauling of communication & power cables.

Single & Double Eyelet Cable Pulling Grips

Cat. No.	Description	Cable Dia (mm)	Eye Type	No of Wires	Eye Dia (mm)	Length (mm)	Breaking Load (kg)	Pack Qty
SCG11015	Single eyelet cable pulling grips	10-15	1	2	5	600	1500	1
SCG11520	Single eyelet cable pulling grips	15-20	1	2	6	600	2500	1
